

GRADUATION FACTSHEETS

[DECEMBER 2015]

CGAP collected essential information on 32 of the 40 ongoing and new graduation projects world-wide as an important input into the December 2015 **Graduation Leadership Summit and Global Learning Event**.

While the data was self-reported, it provides a good understanding of the graduation landscape and an appreciation of the speed with which it has expanded.¹

Over half of the new Graduation projects are being implemented by governments, reflecting the growing interest for this

carefully-sequenced multi-sector approach as an integral part of their national social protection strategies.

All 32 factsheets presented here are not equally detailed and precise. Despite these caveats, the factsheets allow for some analysis of emerging trends across this subsample of new Graduation projects.

Graduation Programs by the Numbers

Overview:

- **Over 75%** of projects have integrated the Graduation Approach into their organization's mainstream strategies
- New programs reach on average over 12,000 households (with outliers at 100 households or an upcoming program to reach 3 million households in Ethiopia)

Targeting:

- **73%** of programs are purely rural (versus 7 being mixed rural/urban and 2 only purely urban)
- **73%** of program target only people below 1.25USD (other reach more broadly below 2,50USD)

Implementation:

¹ The factsheet format was developed by CGAP with inputs from CGAP partners (Nathanael Goldberg from Innovations for Poverty ACTION, Janet Heisey from Trickle Up, and Tatiana Rincon from Fundacion Capital).

- A vast majority of programs offer the full graduation package:
 - **87%** of programs offer consumption support, of which 72% are in cash;
 - **97%** offer asset transfers of which 72 % are in cash;
 - **93%** offer coaching;
 - **91%** do technical skills training
- **85%** of programs provide access to savings services. Interestingly all but one of these programs also does financial capability training.
- At least **10 programs** are testing the use of digitized payments for asset transfer or consumption support
- **84%**of programs conduct research: mostly impact assessment; but some are also exploring specific programmatic questions such as addressing the needs of the youth, use of technology etc.)
- In addition,
 - **48%** of programs offer some healthcare component,
 - **18%** foster access to jobs (UNHCR, South Africa...),
 - **6%** links to wage employment,
 - **18%** provide legal support (UNHCR).
- Other components offered are typically psychological support (UNHCR, IPA Ghana) or community based social support groups (mostly in South Asia).

Moving ahead, CGAP will seek to make this information available with an interactive map and a searchable database. We will also send requests for self-reported updates bi-annually, hopefully with an option to report on-line.

5. Program Objective (100 words)	The TUP Program provides beneficiaries with a package of inputs over a two year period, including the transfer of productive assets, training, subsistence support, and basic health care. The aim of the program is to graduate ultra poor households out of safety net programs to income earning activities as well as linking them with microfinance programs. Through TUP, MISFA hopes to bring economic and social changes in the lives of ultra poor households and also assist them in getting access to mainstream development programs, thus creating aspirations within the severely disadvantaged group of population.

Program Details

1. Program Name	UN High Commissioner for Refugees: Milk and Artisan Value Chains Graduation Project		
2. Country	Burkina Faso		
3. Region	West Africa		
4. Main Contact Person	Name: Yuvé Guluma Organization: UNHCR Email: guluma@unhcr.org Phone: +226 65 50 47 56		
5. Program Objective (100 words)	This project aims to stimulate profitable and sustainable income-generating activities in the milk and artisan sectors for Malian refugee (and host communities for the milk project) in Burkina Faso. At the end of the projects, participants should be able to meet their essential needs using their own capabilities, resources and funding. The projects already have a number of aspects related to the Graduation Approach – including a sequenced approach to self-reliance consisting of market analysis, consumption support, capacity building, asset building, cash/capital grants, access to credit, etc. The integration of the Graduation Approach into both projects began a few months ago but it is expected that the approach will create more concrete benchmarks to monitor and through coaching will allow UNHCR to tailor project activities to the needs of individual participants and build in a savings component.		
6. Start Date (Year)	2015		
7. Estimated End Date (Year)	2017		
8. Pilot Program?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No	
9. Is the Graduation Approach being integrated into your organization's ongoing work (beyond piloting)?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No	
10. Component of larger program?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No	
	If "yes", name of overall program: Seeds for Solutions – Milk and Artisan Value Chains		
11. Number of households involved	1,000

	<input type="checkbox"/> Only People Below US\$2.50 (PPP)/Day If "yes", what targeting tool used?		
	All project beneficiaries in the Sahelian camps of Mentao and Goudebou. Goal here is to move people with varying socio-economic profiles from one level to the next until they are self-reliant.		
13. Does the program include research?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No	
	What questions does it seek to address? Yes and linked both to the Graduation Approach and the projects into which it is integrated: - Qualitative study on saving practices and financial services. The study covered demand and offer related to financial services and how existing traditional		

saving groups in particular function and how positive practices can be strengthened.

- Mixed methods – Milk and artisan value chain analyses. Analyzed the functioning of value chains from raw materials to consumption and where this needs to be strengthened to improve its functioning and for a better integration of refugees.
- Mixed methods - study on disposable income using the Individual Household Method (milk project baseline and updates). Will evaluate changes in assets and disposable income as a result of the project and the potential to invest.
- Transtec assessment (artisan baselines and updates) – mainly around business development, market access and assets as a proxy indicator of wealth.
- Nutrition Knowledge Attitudes Practices and Behavior study. Causal analysis of malnutrition linked to lack of knowledge and poor infant and young child feeding and hygiene practices as well as health seeking behavior.

14. Scale up plans:

What are the main objectives? (100 words)
 For the moment, the project seeks to serve 1,000 participants through a value chain approach. Scale-up plans haven't been developed as yet.
 Target no. of households? TBD Over how many years? TBD

	Organization: UNHCR		
	Email: carlacci@unhcr.org		
	Phone: +506-2296-0827		
5. Program Objective (100 words)	This projects aims to support the most vulnerable people to permanently overcome poverty. The project's objective is that people who "graduate" become self-reliant as a result of having gained a decent job, having built support networks and having strengthened their self-esteem. Costa Rica offers the conditions required to promote the full local integration of refugees, however access to employment opportunities remains the biggest challenge for the population's well-being and protection. Many refugees have valuable previous work experiences and a significant level of education, however, it is often not easy for them to find permanent livelihood opportunities in the country. Among the variety of reasons for this includes the lack of access to information about their rights and documentation, as well as discrimination and difficulties accessing educational opportunities or verification/certification of existing educational qualifications.

What are the main objectives? (100 words)

As part of the sustainable solutions initiative, UNHCR seeks to ensure participants in Graduation move from dependence to self-reliance and have established the following graduation criteria:

- Economic self-reliance: Live with an economic and stable activity for 6 month at least. This activity shall remain in good working conditions and conform to the labor rights in Costa Rica. This job will bring basic needs to the family: Shelter food, clothes, public services (water and electricity), health, and access to primary and secondary school.
- Strengthened self-esteem: The person will improve his/her emotional state of mind and will improve her integration in Costa Rica. The person shall be conscious of her rights and duties and will be in a better capacity to take decisions.
- Community support networks: The person shall be more active and integrated in interacting with its environment in Costa Rica, for example in religion places, associations, etc.
- Valid documentation: The participant or his or her family shall have a valid ID documentation.

5. Program Objective (100 words)	More than 187,000 refugees and asylum seekers are currently registered with UNHCR Egypt, including refugees from different African countries in a protracted situation and Syrians who entered the country in recent years. UNHCR's cash assistance and the World Food Programme's food assistance can only reach a small part of the population, making income generation essential to enable refugees to cover their basic needs. The Graduation program's main objective is the economic empowerment of refugees and the affected Egypt host community. With the enhancement of soft skills, technical skills, business skills and business coaching, the program aims to facilitate sustainable engagement in wage employment or self-employment.

14. Scale up plans:

What are the main objectives? (100 words)
 UNHCR is utilizing the Graduation Approach in three locations: Cairo, Alexandria and Damietta. The further scaling of the Graduation Approach is subject to funding. UNHCR funding prospects for 2016 indicate that the program scale could be maintained or possibly lowered. However, the number of refugees in need of livelihood support and eligible for the graduation approach is much higher than the number of beneficiaries in the current program. Scale-up plans also include supporting existing small businesses (not necessarily the most vulnerable) which may result in increased wage-employment opportunities for refugees.

	Organization: Trickle Up		
	Email: jcoy@trickleupguate.org		
	Phone: +502-7951-1207		
5. Program Objective (100 words)	<p>This project features a combination of the Graduation Approach to livelihood development with Community-Based Rehabilitation (CBR), which is the most prominent approach utilized by disability-focused institutions to the integration of people with disabilities, reaching more than half a million people worldwide. The project provides health, education, and social services to 100 children with disabilities while simultaneously increasing the economic capacity of their families through increased savings and income. The project takes place in rural, indigenous communities, where extreme poverty and malnutrition rates are very high and people with disabilities confront significant barriers to full and productive participation in community life. Through a partnership with the municipal government and a local non-governmental organization, Trickle Up aims to build the awareness and capacity of the national disability office to replicate and scale this approach.</p>

5. Program Objective (100 words)	The Economic Empowerment for Q'eqchi Women project will increase the capacity of 100 young Q'eqchi' women, and 100 of their parents and siblings, in seven rural communities in Guatemala to break the intergenerational cycle of poverty through an integrated economic empowerment and reproductive rights project. Specifically, this project aims to increase participant income and financial literacy, capacity to access and manage appropriate savings and credit tools, and knowledge of reproductive and sexual rights. Targeting women between the ages of 10 and 19, this project is novel in its incorporation of reproductive and sexual rights training into a Graduation Approach.

2. Country	Currently in Kenya and Uganda		
3. Region	Sub-Saharan Africa		
4. Main Contact Person	Name: Dianne Calvi, CEO		
	Organization: Village Enterprise		
	Email: dianne@villageenterprise.org		
	Phone: +1 650-802-8891 x111		
5. Program Objective (100 words)	Village Enterprise has been working for over 27 years to end extreme poverty in rural Africa. We believe in the power of entrepreneurship to transform lives. We equip people living in extreme poverty with resources to start sustainable businesses and establish savings groups. Our Graduation program generates increases in income, savings, and standards of living, thus breaking the cycle of poverty. Using mobile technology and expanding through partnerships, Village Enterprise implements a Graduation model that is cost-effective, scalable, and locally adaptable. Working with partners, Village Enterprise has adapted its graduation model for conservation areas, post conflict regions, and for youth.		
6. Start Date (Year)	Organization started in 1987 implementing a grants-based program for the ultra poor. Comprehensive Graduation Program launched in 2011		
7. Estimated End Date (Year)	2030 as the SDG Goal of ending extreme poverty will be reached.		
8. Pilot Program?	<input checked="" type="checkbox"/> Yes	<input checked="" type="checkbox"/> No

13. Does the program include research?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No	
	<p>What questions does it seek to address?</p> <p>In October 2013, Village Enterprise launched a three-year, independent Randomized Controlled Trial (RCT) of its ultra-poor microenterprise development program. This large study is being conducted with data from over 6,600 households in Uganda by Innovations for Poverty Action (IPA) (and previously by BRAC) with the assistance of academics from University of Chicago, Yale, Princeton and Oxford Universities.</p> <p>The purpose of the evaluation is to prove the impact of the program on extremely poor households as well as to guide future program refinements and expansion of the Village Enterprise model. This study aims to contribute to the current dialogue about how best to design programs for ultra-poor households – a rich discussion following the positive results of the CGAP-Ford Foundation Graduation pilots in six countries (Banerjee et al, 2015). It is anticipated that the Village Enterprise RCT will bring new knowledge about how to best structure social protection programming to reach the extreme poor. Furthermore, this study will capture the marginal effects of some of the unique features of the Village</p>		

Enterprise program (e.g. training/mentorship and savings) to increase knowledge of the relative impact of each component (cash, training/mentorship, and savings) of our Graduation program.

14. Scale up plans:

What are the main objectives? (100 words)

In the next 5 years, Village Enterprise will start 22,000 new income-generating businesses through its existing structure in Kenya and Uganda and 13,000+ additional businesses through 2-3 flagship partnerships in additional African countries. Village Enterprise will train 105,000 rural ultra poor Africans and lift 700,000 people out of extreme poverty in 5 years and establish partnerships that will end extreme poverty for millions in 10 years. Our strategic priorities:

- 1: End extreme poverty for over 700,000 Africans by 2020
- 2: Develop new innovations for the bottom of the pyramid
- 3: Build upon existing thought leadership in the international development sector

Target no. of households? Over how many years?
 105,000 (5 yrs), 1,000,000 (10 yrs) 5 and 10 years

Yes, Concern Rwanda carries out a research (and commenced with a baseline in 2011 for both the target HH and a control group of HH in similar setting but who do not receive an support), in partnership with the Institute of Development Studies. Key broad questions include Identifying: <ul style="list-style-type: none"> • Different pathways to graduation for different participating households; • Human and social indicators of graduation as well as income- or asset-based indicators; 		

- Indicators of resilience and sustainability over time that go beyond reaching benchmarks or crossing thresholds at one point in time;
- Enablers and constraints to graduation beyond the household or program level, including markets, infrastructure, policies, complementary programs and services.
- Examination of the design and implementation of the program/Limitations of the current approach/Lessons for future programming
- Placing current research findings in the context of the emerging literature around graduation internationally and in the discussions around social protection in Rwanda

14. Scale up plans:

What are the main objectives? (100 words)

The program was initially implemented in four districts (2014), and has since been scaled up to an additional district of Gisagara. The program currently reaches over 11,000 direct beneficiaries in 2,600 households over the four districts, but will increase to 3,200HH with 13,536 beneficiaries by end of this year (2015). During the strategic planning (2017-2020), the country team prioritized scaling up an integrated graduation program that will include health & nutrition, education and livelihood interventions which will ensure holistic wellbeing of the target HH in Rwanda. In addition, the government of Rwanda has reviewed the Concern implementation approach with an objective of learning and incorporating best practices from our current program, and hope to invest in improved mechanisms for better targeting, monitoring and evaluation of the VUP program, as outlined in the National Social Protection Strategy.

Program Details

1. Program Name	Targeting the Ultra-Poor programme, South Sudan Pilot		
2. Country	South Sudan		
3. Region	Sub-Saharan Africa		
4. Main Contact Person	Name: Lauren Whitehead Organization: BRAC USA Email: lauren@bracusa.org Phone: +1212-808-5615		
5. Program Objective (100 words)	This pilot was designed to test BRAC's flagship Targeting the Ultra-Poor programme as pioneered in Bangladesh among a vulnerable population of the ultra-poor in South Sudan, specifically adding relevance to Graduation in the Sub-Saharan Africa context. This pilot was also intended to provide insights on implementing the current modalities of the TUP program in a fragile and conflict-affected state.		
6. Start Date (Year)	2013		
7. Estimated End Date (Year)	2015		
8. Pilot Program?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No	
9. Is the Graduation Approach being integrated into your organization's ongoing work (beyond piloting)?	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No, not in South Sudan	
10. Component of larger program?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No	
	If "yes", name of overall program: BRAC Targeting the Ultra-Poor programme		
11. Number of households involved	250		
12. Targeting Criteria—Check all that apply	<input checked="" type="checkbox"/> Rural	<input type="checkbox"/> Urban	<input type="checkbox"/> Mixed, Rural & Urban
	<input checked="" type="checkbox"/> Women Only		<input type="checkbox"/> Mixed Gender
	<input checked="" type="checkbox"/> Only People Below US\$1.25 (PPP)/Day If "yes", what targeting tool used?		
	<input checked="" type="checkbox"/> Only People Below US\$2.50 (PPP)/Day If "yes", what targeting tool used?		
13. Does the program include research?	<input checked="" type="checkbox"/> Yes	<input checked="" type="checkbox"/> No	
	What questions does it seek to address? Researchers will use a randomized evaluation to assess which components of a "targeting the ultra-poor" program are required to have impact greater than the value of an equivalent cash transfer. A total of 625 households will be randomly assigned to four groups. By comparing pre and post-project surveys, researchers seek to identify what assets best serve the needs of the population, the impact of asset transfers to the ultra-poor compared to traditional consumption transfers and baseline, and the impact return to capital of asset transfers based on the value of assets distributed. Results of this study will provide insight as to the necessary costs of a successful asset-transfer program in improving the incomes and livelihoods of the ultra-poor. The RCT was conducted by researchers through UC Berkeley as part of a partnership with the Center for Effective Global Action (CEGA) and BRAC.
